

Choosing the right patient engagement solution for your practice

Patient engagement is a top priority for healthcare providers – and for good reason. We know that when patients are engaged in their care, they are more likely to have positive health outcomes. Most patient engagement platforms have similar features but the best ones prioritize the patient experience.

VALUE

PATIENT ENGAGEMENT PLATFORMS HAVE BEEN PROVEN TO ACCOMPLISH THE FOLLOWING GOALS:

Improved Patient Experience

- Increased patient satisfaction
- Enhanced referrals
- Increased access to care
- Improved communication

Improved Outcomes

- Faster 'time up & go' (TUG) for hip & knee
- Improved physical function
- Increased knee flexion at >3 weeks
- Reduced pain
- Increased PROM completion

Reduced Operational Costs

Reduction in no-shows & surgery cancellations

Reduction in phone calls

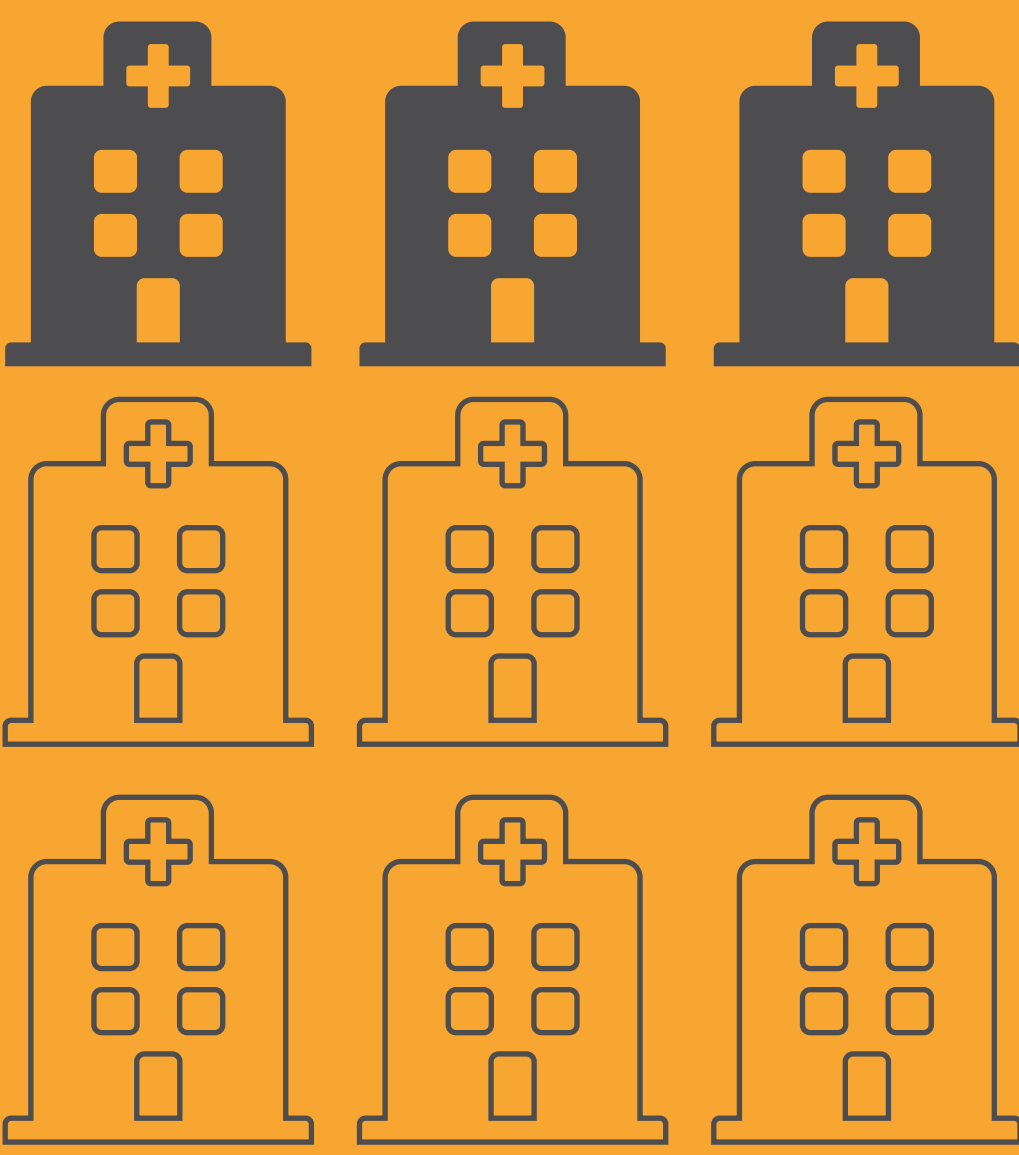

Improved operational efficiency

Reduced Costs of Care

- Reduction in savings in EoC
- Reduction in PT visits
- Reduction in ER visits
- Shorter length of stay

INTRODUCING INTELLIJOINT CARE™

A UNIQUELY PATIENT-CENTRIC ENGAGEMENT PLATFORM

Intellijoint CARE is a customizable digital patient engagement platform purposefully designed to support orthopaedic practices who want to deliver highly personalized care experiences to their patients and their families while optimizing time for surgeons and staff.

From referral to recovery, your patients are supported through their entire episode of care.

EDUCATE

Give patients the knowledge they need to confidently participate in all aspects of their care

MOTIVATE

Encourage patient progress remotely with just the right communications at just the right time

MONITOR

Use detailed engagement insights and survey responses to identify opportunities for intervention

MEASURE

Optimize clinic efficiency and outcome quality with the delivery of automated PROMs and PREMs

FEATURES

Simple Customization

Tailor the experience to reflect your clinic's vision and brand

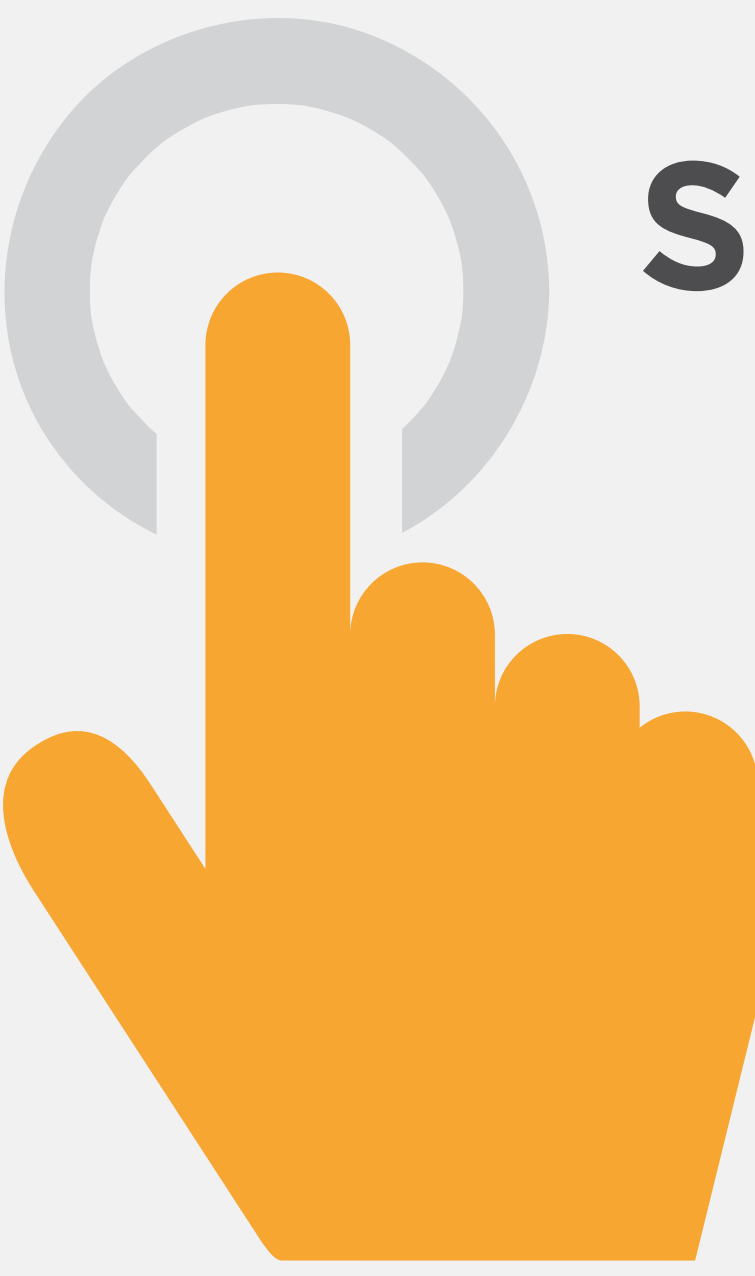

Intuitive Design

Driving high rates of adoption by both staff and patients

Web-Based Platform

MOBILE-FIRST DESIGN

Full functionality on any device, without compromise and without the need for the app to be downloaded

Flexible Survey Tools

Allow for the collection of NPS, PROMs, PREMs

Patient-Centric Care Circles

Family, community partners, and healthcare providers can collaborate, connect, and communicate

Together, let's empower patients, improve outcomes, and create engaging care experiences.
